Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	<i>Describe customer with 3-4 key characteristics - who are they?</i>	Credit card applicants, salaried individuals, self-employed professionals, and customers with varying income levels who want a credit card based on their financial profile.
I'm trying to	<i>List their actions or goals - what are they trying to achieve?</i>	Get my credit card approved quickly, easily and with the best possible terms and credit limit.
but	<i>Describe what problems or barriers stand in the way - what stops them now?</i>	The credit card approval process is complicated, requires multiple documents, and the eligibility criteria are not clearly understood.
because	<i>Enter the "root cause" - why the problems or barriers exist - what needs to be solved?</i>	Manual verification, complex financial evaluations, multiple credit history checks and lack of real-time data analysis cause delays and inconsistent approval decisions.
which makes me feel	<i>Describe the emotions from the customer's point of view - how does it impact them?</i>	Anxious, frustrated and uncertain about whether my credit card application will be approved or rejected.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	a credit card applicant	get my credit card approved quickly and easily	the approval process takes a long time	manual verification, complex eligibility checks and multiple document verifications are time-consuming	frustrated and uncertain
PS-2	a bank/financial institution	predict credit card approval accurately and reduce default risk	there are too many applications and traditional methods are not accurate	data is in different formats, manual assessment is prone to errors and lacks real-time analysis	overwhelmed and pressured to make correct decisions
