Empathize & Discover

Date	01 July 2026
Team ID	SWTID-2026-8998
Project Name	Credit Card Approval Prediction
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-understand visual tool that captures the thoughts, behaviours, needs, and challenges of a **credit card applicant** throughout the credit approval process.

It helps the project team better understand the applicant's expectations, concerns, and decision-making behaviour. By analysing the user's perspective, the team can design an AI-powered solution that simplifies the credit card approval process, reduces manual effort, and provides faster, fairer, and more accurate approval decisions based on financial and demographic information.

The empathy map supports the development of a machine learning-based credit card approval system by identifying the applicant's goals, frustrations, and expectations, enabling the creation of an efficient, transparent, and user-friendly approval platform.

Example:
