

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	01 July 2026
Team ID	SWTID-2026-8998
Project Name	Credit Card Approval Prediction
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through Gmail Registration through LinkedIn
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	Credit Card Application	Form interface to collect user demographic values, financial profiles, and proof documents
FR-4	Credit Prediction Engine	Dynamic real-time execution of trained AI classification models to evaluate risk probability
FR-5	User Dashboard	Interactive status display, personal historical credit limits tracking

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The application should provide a simple, user-friendly interface for all users.
NFR-2	Security	User data and credit information should be securely stored and encrypted.
NFR-3	Reliability	The system should provide accurate and consistent credit card approval prediction results.
NFR-4	Performance	Credit card prediction results should be generated within a few seconds.
NFR-5	Availability	The application should be available 24×7 with minimal downtime.
NFR-6	Scalability	The system should support multiple users and increasing application requests efficiently.
