

Demonstration of Proposed Features

Date	01 July 2026
Team ID	SWTID-2026-8998
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Applicant Data Entry	Allows users to enter personal, financial, and employment details through the web application.	Implemented	Yes	Working successfully
2	Data Preprocessing	Cleans and prepares applicant data before prediction.	Implemented	Yes	Successfully integrated
3	Credit Card Approval Prediction	Predicts whether the application is Approved or Rejected using machine learning.	Implemented	Yes	Accurate prediction generated
4	Multiple ML Model Comparison	Compares Logistic Regression, Decision Tree, Random Forest, and XGBoost models to select the best-performing model.	Implemented	Yes	Best model selected
5	Flask Web Application	Provides a simple interface for prediction and displaying results.	Implemented	Yes	User-friendly interface
6	IBM Watson Machine Learning Deployment	Deploys the trained model on IBM Cloud for real-time predictions.	Implemented	Yes	Successfully deployed

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
