

Project Demo Planning

Date	01 July 2026
Team ID	SWTID-2026-8998
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Project Introduction	Introduce the project, objectives, and the problem addressed by the system.	1	Team lead
2	Dataset & Machine Learning Models	Explain the dataset, preprocessing, and the ML algorithms used (Logistic Regression, Decision Tree, Random Forest, XGBoost).	1	Member 5
3	System Architecture & Workflow	Demonstrate the system architecture, data flow, and prediction process.	1	Member 1
4	Live Application Demo	Show the Flask web application by entering applicant details and displaying the approval prediction.	2	Member 2
5	IBM Watson Deployment	Demonstrate the deployed model and explain cloud-based prediction.	3	Member 3
6	Results & Conclusion	Present model accuracy, comparison, future enhancements, and conclude the project.	2	Member 4

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the need for automating credit card approval using machine learning.
2	Solution Overview	Describe the architecture, technologies, ML models, and project workflow.
3	Live Feature Demonstration	Demonstrate applicant data entry, prediction generation, and approval/rejection result using the Flask application.
4	Q&A Session	Answer questions related to the dataset, machine learning models, Flask application, IBM Watson deployment, and project implementation.
