

Solution Architecture

Date	01 July 2026
Team ID	SWTID-2026-8998
Project Name	Credit Card Approval Prediction
Maximum Marks	5 Marks

Solution Architecture Diagram:

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Collects applicant details and displays the credit card approval result.	HTML, CSS, Bootstrap
Backend	Processes user input and connects the web application with the machine learning model.	Python, Flask
Machine Learning Model	Predicts whether the credit card application is Approved or Rejected based on applicant data.	Scikit-learn, XGBoost
Database	Stores the dataset and trained machine learning model.	CSV Dataset
